

**REMARKS**

Entry of this amendment, reconsideration, and allowance are respectfully requested.

Applicants note with appreciation the indication of allowable subject matter in claims 12-14.

Claim 1 incorporates the subject matter of allowable claim 12 (now canceled). Claim 1 was also amended to include that the programmable current threshold command “identifies a programmed current threshold” to provide antecedent for “said programmed current threshold” in original claim 12.

In response to the Advisory Action mailed February 4, 2009, an interview was conducted with Examiner Thomas and SPE Sherry to work out concerns about the proposed amendments to claim 1 to place the case in condition for allowance. It was agreed that the “store” in claim 1 would be replaced by “said receiver” and that the word “first” would be used to help distinguish the programmed first current threshold from the second current threshold with the understanding that the second current threshold may or may not be programmed.

The dependencies of claims 13 and 14 are appropriately modified in view of the cancellation of claim 12. The term “processor means” is replaced with “processor” in claim 16 to ensure consistency with claim 1 terminology. Because all of the remaining pending claims depend from claim 1, claims 1-11 and 13-25 should now be allowed.

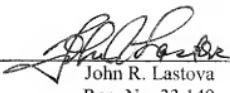

The application is in condition for allowance. An early notice to that effect is respectfully requested.

Fabio VERONI  
Appl. No. 10/553,168  
February 11, 2009

Respectfully submitted,

**NIXON & VANDERHYE P.C.**
